

Actuarial on-campus interviewing and position posting is handled by Natural Sciences Career Services (NSCS).

There are several advantages for recruiters and students that are available through this approach. Job openings can be posted on-line, a large number of interviewing rooms are available, and resume searches can be conducted from one centrally located site. The NSCS interviewing rooms (Painter Hall 5.03) are centrally located on campus near the Main Building (also known as the Tower); see the online maps at www.utexas.edu/maps/.

Dr. Ray Easterlin, who has been at UT Austin since 1996, directs NSCS. All actuarial students, regardless of their formal major, are assisted by Senior Career Advisor Laura Mondino, who has worked in Career Services for several years. Laura Mondino, temporarily also serving as Recruiting Coordinator, handles interview scheduling and can arrange a room reservation if you plan an information session.

For detailed information on how the system will operate, contact NSCS: 512/471-6700, nsemploy@uts.cc.utexas.edu, or see the website at careers.ns.utexas.edu. The process is roughly as follows:

Employers may post job or internship openings with required qualifications at any time during the year. Position announcements can be mailed, faxed, or emailed to NSCS, *or* employers may post the position through eRecruiting on their own. To obtain access to eRecruiting, please contact the NSCS recruiting coordinator at nsemploy@uts.cc.utexas.edu with your contact name, title, email address, mailing address, phone & fax number, and company web address.

Qualified students then indicate their desire to apply for the posted opening, and employers are provided applicants' resumes so they can select those to be invited to interviews. Invited applicants can then sign up on line for an interview, and the employer is provided a final schedule.

NSCS provides professional and skilled assistance to employers and students alike.
