UNIVERSITY OF TEXAS AT AUSTIN

Quiz #8

Review of options and forwards.

In preparation for the next class, please solve the following problems:

Problem 8.1. (5 points) For a continuous-dividend-paying asset whose price is denoted by $\mathbf{S} = \{S(t), t \ge 0\}$ with the dividend yield δ , what is the expression for:

- (i) (2 points) the **prepaid-forward** price for delivery of one unit of the asset at time-T;
- (ii) (3 points) the **forward** price for delivery of one unit of the asset at time -T

Problem 8.2. (4 points) Consider an asset with the price is denoted by $\mathbf{S} = \{S(t), t \ge 0\}$. (2 points) What is the expression for the **payoff** of a long K-strike European call on that asset with exercise date T?

(2 points) What is the expression for the **payoff** of a long K-strike European put on that asset with exercise date T?

Problem 8.3. (6 points)

Consider an asset with the price is denoted by $\mathbf{S} = \{S(t), t \ge 0\}$. Portfolio A consists of the following components:

- a long K-strike European call on **S** with exercise date T, and
- a short K-strike European put on **S** with exercise date T. Draw the payoff curve of the above portfolio.
