

Journal 5

M316L - Fall 2009

Due November 30

Please write a few paragraphs in response to the following questions. Keep the total length of your submission between 1 and 3 pages. You will be graded on the ideas you put forward, and how well you do so. There are 20 possible points.

In this final journal, I want you to reflect back on the this semester. Please be honest.

Regarding M316L specifically...

- What topic was the most interesting to you? least interesting?
- About what topic did you learn the most? the least?
- Did you find any activities particularly successful? unsuccessful?
- Do you feel properly equipped to teach mathematics to your future students?

Think back to the beginning of the semester and the first journal. Read through your responses.

- Do you still agree with what you wrote? Has anything changed?

Think about the course in general.

- What do you think about the structure of the course (i.e., few lectures, mostly hands-on activities)?
- Would you change anything about the course (e.g., structure, content, pace, etc.)?
- What is something from this course that you think you might use when you are a teacher?
