

Name:

56245 Extra question for Exam 1

This will be worth 10 points on your exam.

(10 points) Use $h(x) = x^2 + 4$ and $q(x) = 5x$.

(2 points) Solve $h(x) = q(x)$.

(3 points) Solve $h(x) > q(x)$. (Hint: It will help to have some kind of graph here)

(3 points) Solve $h(x) < q(x)$.
